25th International Conference on Medical Image Computing and
Computer Assisted Intervention
September 18–22, 2022
Resorts World Convention Centre Singapore

Dear Colleagues and Friends,

The 25th International Conference on Medical Image Computing and Computer Assisted Intervention, MICCAI 2022, will be held from September 18th to 22nd 2022 in Resort World Convention Centre Singapore. This will be the first MICCAI conference hosted in Southeast Asia.

As you all know, the annual MICCAI conference attracts the world's leading biomedical scientists, engineers, and clinicians from a wide range of disciplines associated with medical imaging and computer assisted intervention. The conference series includes three days of scientific content, including oral presentations and poster sessions. Workshops, tutorials, and challenges are held on the days preceding and succeeding the conference. Delegates can enjoy many different session formats in these satellite events that offer a comprehensive forum to further explore topics relevant to MICCAI. The Students and Women in MICCAI board will complete the program with exciting social events.

MICCAI 2022 will be particularly interesting for industrial participation. Singapore and its nearby area have a growing healthcare market. It is a gateway to Asian's Healthcare Market. Industrial sessions and exhibitions provide interesting opportunities of exchange between clinic, academia, and industry.

We believe you should consider supporting this meeting and will be happy to discuss your sponsorship requirements. We aim to ensure that this event both highlights your organization and creates meaningful linkages with members of the community.

ABOUT MICCAI

MICCAI

The MICCAI Society was formed as a non-profit corporation on July 29, 2004, pursuant to the provisions of the Minnesota Non-Profit Corporation Act, Minnesota Statute, Chapter 317A, with legally bound Articles of Incorporation and Bylaws. The official corporate name is The Medical Image Computing and Computer Assisted Intervention Society (“The MICCAI Society”). The organization was founded with a focused professional mission and with member enrollment and benefits. The Society is governed by an elected Board of Directors (the MICCAI Board) with officers, including a President, Executive Director, Secretary and Treasurer.

Society staff coordinators are appointed by the Board to help manage and conduct the various activities of the Society, including membership, publications, public communication, and industry relations. The Society’s goals and focus are multi-disciplinary in nature and bring together scientists, engineers, physicians, surgeons, educators and students who contribute to and participate in the mission and activities of the Society.

The history of the Society dates from the early 1990s when three international conferences eventually evolved into a single conference in 1998, and was named the MICCAI (Medical Image Computing and Computer Assisted Intervention) Conference.

ABOUT CLINICCAI

The Clinical Translation of Image Computing and Computer Assisted Interventions – CLINICCAI is a parallel track in the main MICCAI conference dedicated to presentations by healthcare practitioners willing to discuss their translational research.

The main areas are aligned to MICCAI, including medical image computing, computer-assisted interventions, and medical robotics.

The first edition of CLINICCAI took place on 2021, was organized in Strasbourg and held virtually due to COVID-19 pandemic. It gathered a great audience and allowed participants to explore and get inspired by the other scientific sessions and workshops of the conference.

The main goal of the conference is to create a day to reinforce the ties between MICCAI community and healthcare practitioners, enabling the translation of technology while exploring further how to generate value for patients and healthcare systems.
