

# MICCAI 2025

28<sup>th</sup> International Conference on  
Medical Image Computing and  
Computer Assisted Intervention  
23-27 September 2025

Daejeon Convention Center

*Daejeon*  
REPUBLIC OF KOREA

## OPPORTUNITIES FOR INDUSTRY

The theme of MICCAI 2025 is “From Concept To Clinical”, and just as industry involvement is essential to moving concepts into clinical practice, industry involvement is essential to MICCAI.

At MICCAI 2025, we are highlighting the involvement of industry in the success of the MICCAI community. There will be several outstanding opportunities for job seekers, entrepreneurs, small businesses, and industry giants to engage with, learn from, and contribute to the MICCAI industry-community experience:

- **Keynote Talk:** MICCAI 2025 will feature an industry keynote address on ethical AI and AI safety in commercial research and product development.
- **Lighthouse Challenges:** These special, sponsored challenges feature high-quality and high-impact tasks and data, geared towards solving challenges at the forefront of industry. Learn more [here](#).
- **Industry panel:** Focusing on “What I wish I knew when choosing a career in industry”. Panel speakers cover experts from multiple career paths in, through, and out of industry.
- **Career building session:** Building upon the successful history of mentorship and academic-industry events at previous MICCAIs, this event will feature opportunities for small groups of the the best and brightest at MICCAI to chat with and get career advice from leaders in academia and industry.
- **CLINICCAI:** A MICCAI event dedicated to healthcare practitioners willing to discuss their research on the translational and clinical aspects of medical image computing, an outstanding opportunity to learn about the next wave of AI industries.

We look forward to seeing you at MICCAI 2025 in Daejeon!
